FARMINGTON MASONS TO BUILDS HANDSOME TEMPLE.

Farmington Lodge No. 132 A. F. & A. M. closed a deal last Saturday with Mrs. Fanny Tolman for the lot on Columbia street adjoining the property of the First M. E. Church on which to erect a handsome temple, for which they paid \$1,450. The lot is 70 feet front, running the depth of the block.

The Lodge will at once have an architect or architects to draw up plans to be submitted for approval. It is the purpose to erect a two-story building with basement. The first floor will be fitted up with reception parlor, banquet hall and cuisine. The second floor with lodge rooms so arranged as to be adapted to the Knights Templar degree of the order. The basement, besides the heating plant, will also have a large room fitted up for gymnasium purposes.

The site selected for the temple is centrally located, being one block west of the Public Square, and will add much to the appearance of the street. The town is to be congratulated on this enterprise of No. 132 A. F. & A. M., as it will add another to its many handsome buildings. Work on the temple will be begun as soon as the plans are ready and the contract can be let, and will probably be completed by fall.

The following named members of the Lodge have been appointed as a building committee: M. P. Cayce, Hermann Trauernicht, R. M. Talbert, Ed. Henderson, Judge J. S. Clay and Rev. C. E. Hickok.

CHICKENS.

The application of the Golden Rule might be made to fit the chicken question in town. If you would not like to have your lawn and garden destroyed by your neighbor's chickens do not allow your chickens to destroy your neighbor's lawn and garden. The City Council could help this matter by giving us a chicken law.

ELECTROCUTED AT NATIONAL SHAFT NO. 2.

Felix Furie was electrocuted while at work in shaft No. 2 at the National lead mines Wednesday morning about 2:30 o'clock. He was standing on a trolley ore car to open the gate of a chute for the ore to fall into the car, when he fell against the trolley wire, which struck him across the mouth, and it seems that his feet were caught in the ore so that he couldn't extricate himself or get rid of the wire across his face and mouth. The motorman failing in an effort to extricate him ran to the switch and turned off the current, but when he got back to the car Furie was lying in the car dead. The wire was charged with only 250 voltage, but continuous contact with the wire for the length of time that passed before the current could be shut off did its deadly work.

AN ENJOYABLE CONCERT.

The concert given Tuesday night at the Opera House by the Farmington Brass and Reed Band, under the direction of Prof. Karl Goebel, was a most enjoyable affair. The band was assisted by Mrs. Edward C. Barroll with a vocal solo, "All That I Ask of you is Love;" Miss Mabel P. Slane with a reading, "The Song of the Shirt;" Miss Agnes Hangan with vocal solo, "The Lark Now Leaves His Watery Nest;" Mrs. Harry Shaw with a violin solo, "Liebestraume," accompanied on the piano by Prof. McFerrin, and a reading by Miss Schaefer, "Keeping a Seat at the Benefit." Each of them was enthusiastically encoored and responded in kind. The band played seven numbers, and showed much improvement and progress under the instruction of Prof. Goebel.

OUGHT TO BE EXTENDED.

The excellent work the city fire department was enabled to do at the Cloud house fire and other fires that have occurred in Farmington within the past few years is due principally to the city waterworks. But for this water supply and the pressure that sends the water with such force through the hose when attached to the fire plugs, no effective fire fighting could be done. But there are parts of the city to which the water mains do not extend and which are without the protection from fire and the convenience of water supply for domestic purposes that the more favored part of the city enjoys. It is a municipal plant and these less favored parts have helped to pay, in the way of taxes, the bonds and the interest on them that were voted to install the waterworks. They are therefore entitled to some of the convenience and protection which the waterworks afford. This can only be given by extending the water mains, and is a question that ought to be taken up and considered by the Board of Aldermen.
